1. Select an article from a professional teacher’s journal that is about the concept or the teaching of the concept selected from the following list: sets, cardinal numbers, counting, numeral recognition, numeration system, base or place value. In short, one of the ideas we have already discussed in class.

2. Review the article and write a one page report on the article.

3. The article report should have the following:
   a. Bibliographical entry at the top (your name also)
   b. A half page summary of what the article says.
   c. A half page evaluation by you on the article.

4. I will evaluate your report as follows:
   - follows instructions 5 points
   - clarity of writing 5 points
   - summary 5 points
   - evaluation 5 points
   - overall impact of report 5 points
   - total possible 25 points

5. Some professional journals that are likely sources are:
   - The Arithmetic Teacher
   - School Science and Mathematics
   - Learning Magazine
   - The Instructor

This list is not a limitation, merely a suggestion. There are many other professional teacher journals.
